Figure 6

Figure 6 displays two bar charts comparing the number of cases for various diseases between 1980 and 1990. The Y-axis represents the number of cases, ranging from 0 to 1000. The X-axis lists the diseases: Aids, Cancer, Diabetes, Heart Disease, HIV/AIDS, Influenza, Kidney Disease, Liver Disease, Lung Disease, Mental Illness, Multiple Sclerosis, Parkinson's Disease, Rheumatoid Arthritis, Stroke, Tuberculosis, and Unlabeled.

The top chart shows the number of cases in 1980, and the bottom chart shows the number of cases in 1990. The bars are color-coded: blue for 1980 and red for 1990.

Diseases showing significant increases in cases from 1980 to 1990 include:

- Aids (approx. 100 in 1980, approx. 700 in 1990)
- HIV/AIDS (approx. 100 in 1980, approx. 700 in 1990)
- Liver Disease (approx. 100 in 1980, approx. 700 in 1990)
- Mental Illness (approx. 100 in 1980, approx. 700 in 1990)
- Stroke (approx. 100 in 1980, approx. 700 in 1990)
- Tuberculosis (approx. 100 in 1980, approx. 700 in 1990)

Diseases showing relatively stable or slightly decreasing cases include:

- Cancer (approx. 100 in 1980, approx. 100 in 1990)
- Diabetes (approx. 100 in 1980, approx. 100 in 1990)
- Heart Disease (approx. 100 in 1980, approx. 100 in 1990)
- Influenza (approx. 100 in 1980, approx. 100 in 1990)
- Kidney Disease (approx. 100 in 1980, approx. 100 in 1990)
- Lung Disease (approx. 100 in 1980, approx. 100 in 1990)
- Multiple Sclerosis (approx. 100 in 1980, approx. 100 in 1990)
- Parkinson's Disease (approx. 100 in 1980, approx. 100 in 1990)
- Rheumatoid Arthritis (approx. 100 in 1980, approx. 100 in 1990)
